**Fusion**  
**A revolutionary new holiday home chassis solution fusing intelligent design, innovative thinking and engineering expertise.**

With £5m invested in an on-site engineering facility and an in-house engineering design studio, Fusion is the result of a 5 year research & development project by Bankside Patterson.

Fusion is the most innovative chassis solution in the industry for more than 40 years. It has been designed, engineered and manufactured at our facility in Brandesburton, the most up to date chassis manufacturing factory in Europe.

**Starting from the beginning**  
 From a blank sheet of paper, every feature and benefit of previous chassis and all customer needs have been carefully considered, the best of which have been enhanced and evolved for Fusion. We have sought to add value and exceed expectations with every decision made.

**Back to the drawing board**  
 Our expert technical team has utilised every square inch of sheet metal to design components that optimise available materials, driving the best pound for pound use out of fewer sheets. The finite detail of every incision in the Fusion chassis template has been carefully considered.

**Strength in design**  
 The core strength of the new chassis is the result of a uniquely engineered design that is simple in its complexity.

**Market leading expertise**  
 Fusion has been created using "rule driven" software providing a speedy and flexible process from design through to production to respond to customer needs.

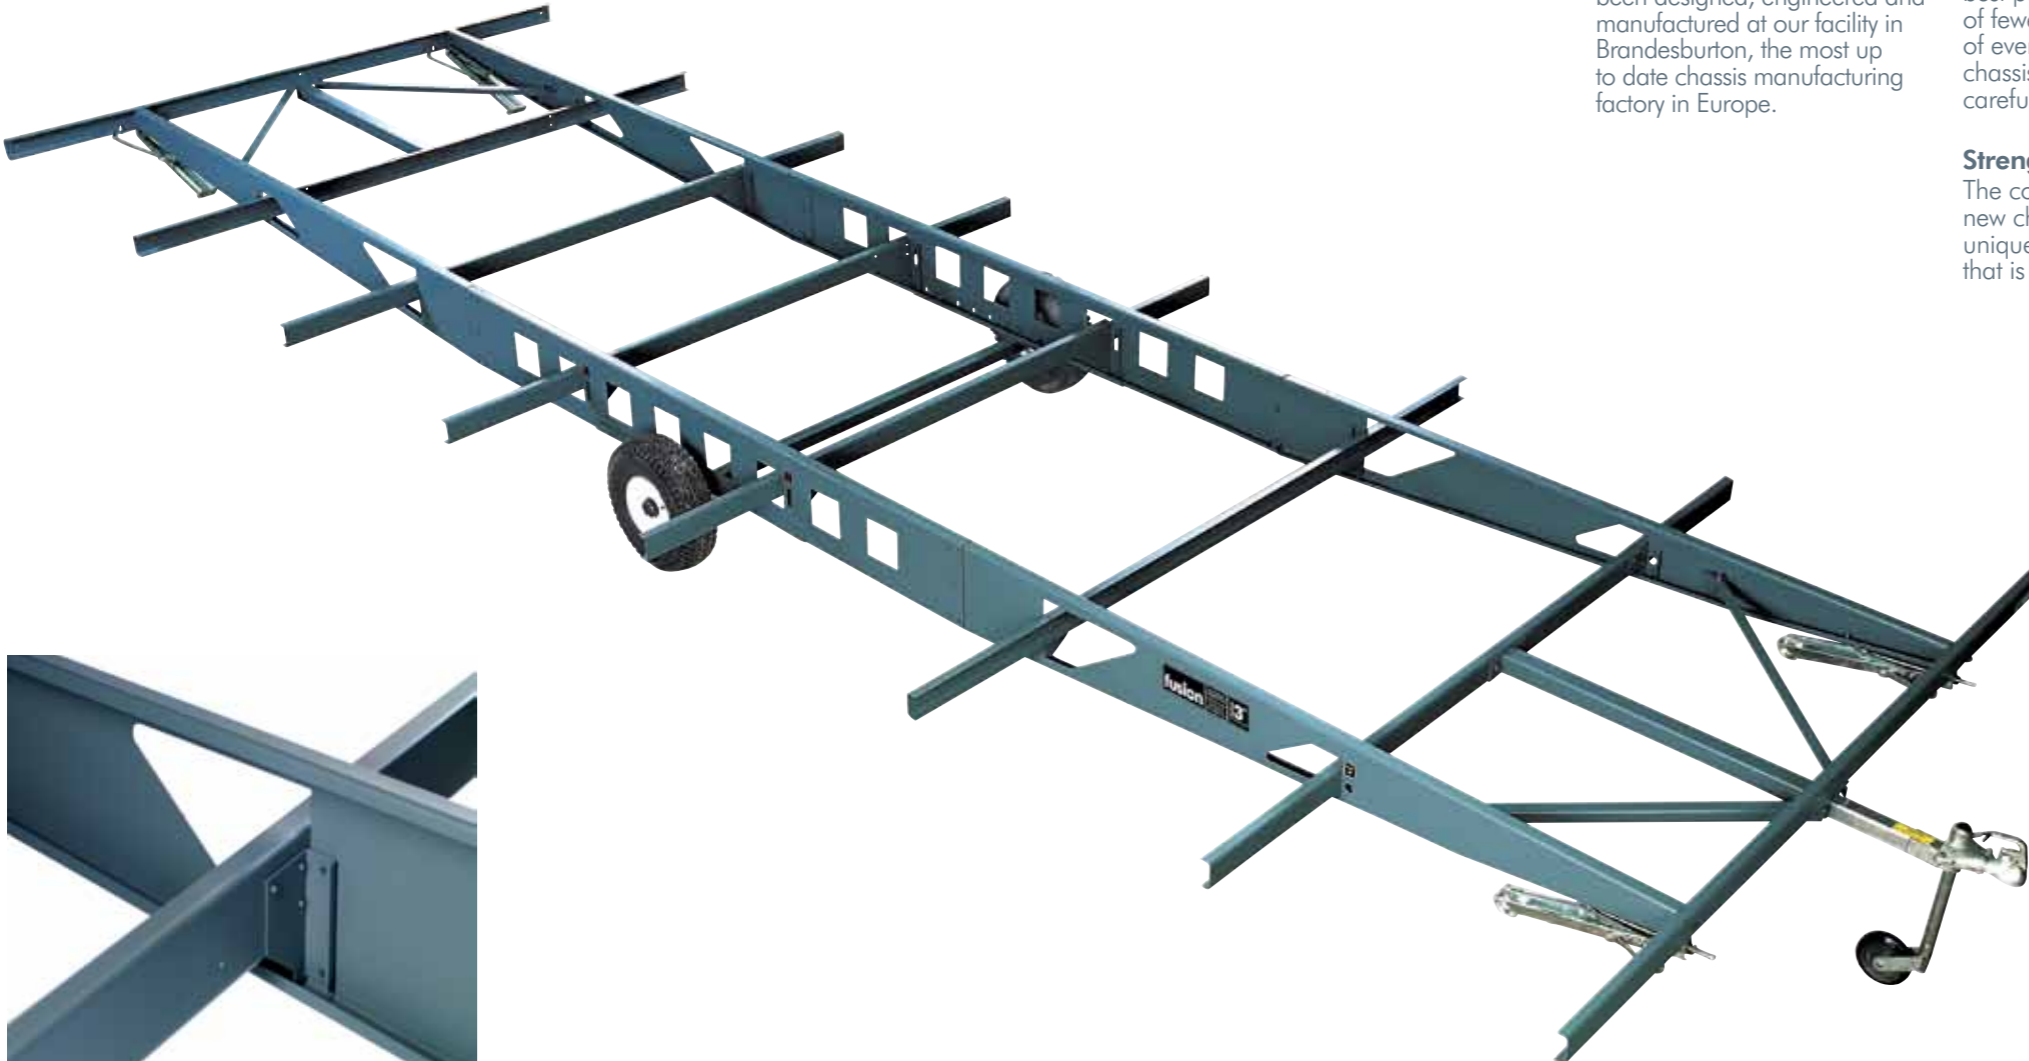

**Customers first – always**  
 Fusion is designed to deliver the best customer experience. From lowering the cost and workload involved in the entire holiday home production process for manufacturers, to reducing the life costs in maintenance for end users.

**Fusion for our future**  
 Fusion is a greener option with reduced production time, more sustainable features, a reduction in waste materials, less welding and no pre-galvanised fumes.

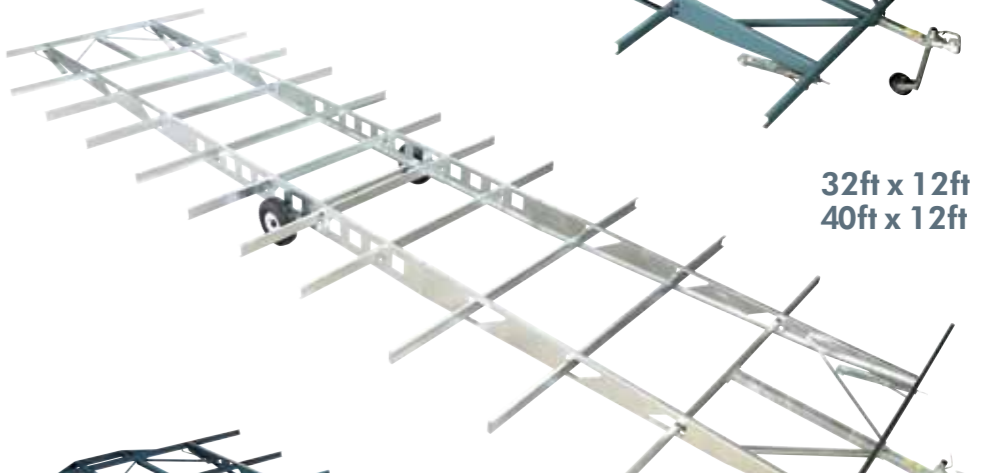

**Fusion comes with excellent anti-corrosion warranties as standard:**  
 Warranty on all Zinphos finished chassis lasts 3 years from point of sale and up to a maximum of 5 years from point of original manufacture. Warranty on the galvanised chassis lasts 10 years from point of sale and up to a maximum of 12 years from point of original manufacture.

- Key features:**
- Cost effective
  - Extended warranty
  - Lower 'whole life' costs
  - Complete "family" of chassis
  - Improved design features
  - Sustainable
  - Aesthetically appealing to holiday home owners

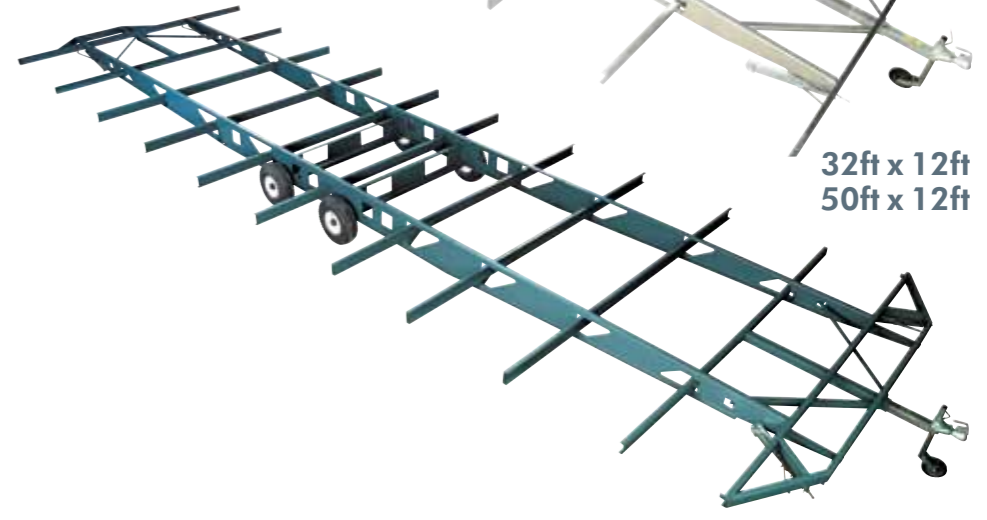

Fusion complies with the National Caravan Council Codes of Practice and meets the International Standards Organisation (ISO) 9002 specification.
